Deloitte.

ShoutOut!

Serve with Integrity

Alex Huang

Dearest Alex,
I want to call out that you have gone over and above for WA Health, with respect to the User Provisioning work package. This includes facilitating detailed discussions with the end client, working with our architecture team, reviewing defects in triage calls, documenting the changes to work instructions in the as-built, participating in deployment calls for SF and Azure and above all doing so with positivity and quality in everything you do.
